Description

Tiger Cat II 48?

The engineers at SCAG challenge themselves with finding a way to shoehorn some of their most powerful zero turn technology into a much more compact footprint without cutting corners – and the result is the Tiger Cat II lineup!

Providing the kind of consistent power you're looking for (the kind of power you'll find in larger commercial zero turn lawn mowers) with a compact form factor, the Tiger Cat II 48 inch model has been designed to offer you the ability to cut upwards of 24 acres of grass in a day without raking sweat.

Built on the top of a full body welded steel frame that offers rock solid strength and durability, the Tiger Cat II 48 inch model also has a low center of gravity that helps to maintain its stability even over uneven terrain.

Tiger Cat II 52?

You'll be amazed at just how agile and maneuverable the 52 inch Tiger Cat II model is as soon as you lay eyes on it.

It's not every day that you see 52 inch lawnmower decks attached to zero turn mowers as compact as this one, but don't be fooled into thinking that this is somehow and underpowered or inconsistent set up.

The folks at SCAG have been able to shoehorn in top-tier technology throughout, providing you with a high-powered lawn mower that can make quick work of up to 24 acres of land in record time – all while maintaining the flexibility and agility you'd expect from a smaller form factor mower like this.

The Velocity Plus lawn mower deck features state-of-the-art blade technology to move through longer grasses with ease, providing for a clean, consistent cut that keeps your grass healthy and fresh looking pass after pass.

Tiger Cat II 61?

It's almost unbelievable that the folks at SCAG have been able to get so much power, so much performance, and so many next-generation features into a compact mower like this – all while providing a 61 inch mower deck to make quick work of even the largest lawns in Australia!

Capable of reaching speeds upwards of 20 km/h (and 8km/h in reverse), not only will you be able to fly across larger lawns while atop the Tiger Cat II 61 inch model but you're also going to be able to engage a PTO that offers 250 foot-pounds of torque to get through even the deepest and longest of long grasses and yard waste with ease.

Double fuel tanks (providing 9.5 gallons of fuel in total) guarantees that you're able to stay out on the lawn for longer and longer durations. In fact, SCAG says that you'll be able to use the Tiger Cat II 61 inch model to handle up to 24 acres a day without breaking a sweat.
