

Lely Juno Feeder

Increasing feed intake has never been easier. Increasing your feed pushing frequency pays off, it stimulates frequent feed consumption throughout the day and night, resulting in a higher feed intake among your cows. This not only has a positive effect on animal health, but also improves fertility, production and your financial results.

Description

Lely Juno

Increasing feed intake has never been easier

The Lely Juno takes over the repetitive work of pushing the feed multiple times a day. By pushing feed regularly, it is always within the cows' reach. Every cow, even those lower in rank, can eat the roughage it needs for optimal rumen health and growth.
