

Lely Cosmix Concentrate Feeder

Concentrate feeder for cows that deserve a little more. Higher milk yield, improved rumen health and efficient feeding: you get all of these with the Lely Cosmix. Every cow gets the portion of concentrate that it requires. Lely Horizon provides insights into the concentrate intake and helps improve the health of your animals.

Description

Lely Cosmix

By feeding according to cows' requirements, rumen health improves and milk yield rises. The Lely Cosmix, along with the Lely Astronaut, ensures that each cow receives the portion of concentrate it needs. Cows that do not consume enough during milking, heifers and dry cows get their concentrates from the Cosmix. Thanks to the Lely Qwes cow-recognition system, the Cosmix knows precisely how much concentrate the cow is allowed to be fed at any given time.
