

Lely Astronaut

Lely Astronaut - Milking Naturally With free cow traffic, the cows decide themselves when to eat, drink, relax or be milked. This freedom allows cows to behave more naturally and in accordance to their own rhythm, leading to higher milk production and profitability.

Description

Lely Astronaut

Milking Robot

A healthy and stress-free cow makes for more milk in the tank. That is why the Lely Astronaut was designed for cows. One of the features of the milking robot is the unique I-flow concept, which provides a straight route for cows.

Automatic milking introduces a new routine on your farm, providing greater flexibility, enhanced efficiency, and a better work-life balance. It also allows your cows to follow their own rhythm at all times.
