Description

### **Patriot 52?**

Commercial landscapers understand just how important it is to have high quality lawn mowing equipment on hand to cut quickly, consistently, and reliably time after time.

SCAG has been a worldwide leader in producing zero turn lawn mowing equipment for professional landscapers for years now. Their Patriot line – including this 52 inch mowing deck unit – represents the latest and greatest in this technology.

Featuring top to bottom engineering that makes this a dream to use, even for hours and hours on end each day, everything about the Patriot 52 inch zero turn lawn mower has been designed from a performance standpoint. Dual hydro transaxles guarantee that you're able to quickly move into and out of turns with a 0° radius all while maintaining super smooth performance.

## Patriot 61?

The 61 inch mowing deck on this Patriot SCAG lawn mower is a real beast, but it also offers the kind of control and maneuverability you'd expect from something considerably smaller.

The agility that this zero turn lawn mower is able to display helps to separate it from the rest of the pack, giving you the kind of effortless control that you are expecting while still making quick work of larger lawns and estates.

A Kawasaki FX 23 hp motor is the heartbeat of this zero turn lawn mower, giving you plenty of top end speed, plenty of torque, and plenty of power when you need it most – even when you engage the PTO.

Multiple cutting blades will make quick work of even long grass and yard debris. They've been specifically engineered to go for extended amounts of time between sharpening without degrading the quality of cut they produce, too.

At the end of the day, this is very much a commercial grade landscaping lawnmower designed to be used by professionals. It fits right at home on large lawns and estates, making quick work of lawn mowing projects that would have taken hours previously.
